ACTIVITY	POTENTIAL RISKS	CONTROLS
Storing/ transporting Insecticide	Possibility of spillage of proofing material when in transit between clients/sites.	All staff trained in the correct storage, transportation and spillage procedures of insecticides.
Contact with Contaminated Packaging.	Small quantities of proofing could be left within packaging.	Used packaging can be disposed of via non hazardous routes
Contact with contaminated PPE	Staff that did not replace PPE regularly could come into contact with proofing material when handling PPE.	Records are kept for PPE replacement. Staff training given on care of PPE. Line Manager check PPE

Summary

- Mouse Stop is particularly safe. It is deemed not a hazardous material neither to the environment nor human health when used under label directions.
- Technicians apply Mouse Stop in the field by means of a caulking gun
- Safe use of proofing materials depends on the proper use and maintenance of the PPE provided. Technicians are given full training in the use and care of PPE. Regular checks are made to Technician's PPE and records are kept. Line Managers regularly accompany Technicians and ensure that correct practices are being followed.
