

Incorporating stainless steel fibre technology in a silicone body. Use for sealing gaps, holes, cracks and crevices to prevent ingress by rodents.

Sakarot[®] Rodent Barrier is easy to apply using a conventional caulking gun. It is safe to use in food environments and is effective within 20 minutes. Fully water proof with an 8-10 year life expectancy.

Surfaces must be clean, dry and free of dust and loose material before being applied. Cut the tip to the required size and apply, using a caulking gun.

Typical Applications:

- Sealing of wall/floor expansion joints where rodent ingress/egress is recurrent.
- Sealing holes to brickwork, timber, windows, door frames etc.
- Use within food preparation environments to seal around waste pipes, services etc.
- For use where grommets have been chewed to electrical conduits etc.
- For large holes this product can be spread over a Polyethylene Sheet to a depth of 6mm, once cured this can be cut to any shape, simply apply Sakarot[®] Rodent Barrier to the area for fixing and over lay the cut out.

Application:

Joint surfaces must be clean, dry and free from loose material, dust or grease.

To Use:

Cut off cartridge seal, cut nozzle to the required size, attach nozzle to cartridge. Extrude the sealant firmly against the joint surfaces to ensure complete contact. Tool the sealant into the joint to compact, within 5 minutes from application before skin begins to form.

Storage:

Cool dry conditions. Keep out of the reach of children.

Hazard Classification

May cause an allergic skin reaction

Precautions

Wear protective gloves/protective clothing/eye protection/face protection.
Contaminated work clothing should not be allowed out of the workplace.
Avoid breathing vapour
IF ON SKIN: Wash with plenty of soap and water.
If skin irritation or rash occurs: Get medical advice/attention.
Wash contaminated clothing before reuse.
Dispose of contents/container to national regulations

Contains:

methyl 0,0,0-butan-2-one-trioximosilane
